# Germany Beck Project

## Weeks 20 & 21 commencing 24th October

During the past 2 weeks we have continued to import stone to create the carriageway embankments to the east and west of Fordlands Road. As you can see we have almost reached the top of the sheet piles. To give you an idea, the final finished level of the new road will be about 60cm (2ft) higher than this.

The installation of drainage has commenced to the east of Fordlands Road.

During the next two weeks we will continue to import stone into site off Fordlands Road to build up the next section of embankment. Using the same wagons we will be removing the sandy material stockpiles currently located within the proposed Persimmon residential area. This material was generated by the excavation of the water meadow.

By using the same wagons, we keep the numbers of wagons using the local roads to a minimum.

In order to get to the stockpiles the wagons will need to cross Germany Lane. A banksman will be

We will also be progressing the drainage installation.

We do not anticipate any disruption to traffic using the A19 or Fordlands Road but please be aware of stone deliveries using the site entrances off Fordlands Road.

## Safety for children and the wider public.

Please be assured that the different areas of works will be securely fenced at all times to ensure the safety of the public.

We will be receiving further deliveries of stone to site this week. Each delivery will be guided into site by one of our employees once traffic and pedestrians are clear from the site entrance. Please be patient if you are held up for a short time whilst these manoeuvres take place.

Pedestrians will be given right of way along the footpaths of Fordlands Road but please be aware of deliveries using the entrances to site off Fordlands Road on occasion.
